From the ELEMENTARY Department: Dear Parents & Friends - attached to the Bulletin is a reminder of what portions of the labels or boxes to save for our Education Program with Campbell's. This year, we turned in 29,600 labels. In return, we will receive 2 electric typewriters and a 5 gallon Igloo beverage cooler for use in Elementary Department! So, you can see each and every label and UPC code is important to us!! To those of you who have sent us your labels, a great big THANK YOU for them and to those who did not know we save them, a hope that you will remember us when you have soup or any of the other participating foods. Please continue to save these valuable labels all year long and send them to us in Elementary. Our goal next year is to beat this years total for more valuable learning tools!! Once again, THANKS for your continued support!!!

DID YOU KNOW THAT? Deaf people claim two important contributions to the world of sports: The baseball umpire's hand count and the football huddle. William E. Hoy, the deaf baseball outfielder for the Cincinnati Reds and the Washington Senators claims that he was the reason for the hand count. He could not hear the call so umpires began raising their arm to indicate a strike and it soon caught on.

The evolution of the football huddle is difficult to trace but Paul D. Hubbard claims credit for its invention and many persons think he deserves the credit. The huddle was a necessary and natural evolution for a deaf football team because it was necessary for the deaf players to hide their signals from the scrub team they practiced against and from the deaf opponents they played. Hubbard was a quarterback on the 1892, 1893, 1894, and 1895 Gallaudet football

teams. He captained the 1893 and 1895 teams and was nick-named "Eel" by other coaches.

While the credit for the invention of the huddle is on the side of deaf players, unfortunately there is no printed documentation. William J. Marra and Stanley Ferguson of Kansas knew Hubbard personally and both recall Hubbard telling them that he had invented the huddle. He claimed that he had invented the huddle while playing at Gallaudet College.

Today millions of people watch football on television but few realize that the huddle they see forming regularly through the game is most likely a contribution to America's most popular sport by deaf football players.

As a follow-up to last week's quotation from Henry Ward Beecher and information stating that he was one of the original trustees of ISD - Pat Cooper, a high school teacher, informed me that the old dining room/cafeteria was named Beecher Hall in his honor. He was also the brother of Harriet Beecher Stowe who wrote the book, Uncle Tom's Cabin.
